

International Physicists' Tournament

Partnership with the International Association of Physics Students

Remote poll - October 2022

Background

At the 2022 Decision Assembly ([minutes](#)), the IAPS president introduced the organisation to the IPT board, the meeting then included the discussion of benefits and drawbacks of joining the IAPS as one of their event portfolio, gaining more institutional support, wider reach and visibility, but with a broader set of procedures and governing to adopt. After letting the Decision Assembly learn the perception of their local communities on the matter, the IPT execom and the IAPS created a partnership working group, to develop respective documents and operational practices for successful cooperation and subsequent merger. The document pack was shared with the IPT Decision Assembly members via email one month before the poll. The IAPS General meeting had to vote on a mirror strategic decision within the same timeframe.

Poll results

Do you approve the proposal for the IPT to get affiliated with the International Association of Physics Students (IAPS) as an IAPS major event?
The coordination between the IAPS and IPT is regulated by the document pack (sent by mail).

Yes - 8 votes

No - 1 vote
